

COVID-19 Protocols- Student Quarantine

- Once the Wellness Coordinator and/or designee becomes aware of a student who may have been exposed to a COVID-19 positive individual, they will notify the College's COVID-19 Designee, Dr. Vicki Stanavitch, Provost and Vice President for Academic Affairs and Residence Life.
- These protocols also apply to anyone who has visited, or resides in any of the states with high incidences of COVID-19 (as listed by the state of Pennsylvania).
- During this time, the student must quarantine in their residence hall room or home residence for 14 days or provide a record of a negative test following exposure to the Wellness Coordinator and/or designee. These students must attend class virtually and refrain from entering public areas outside of their residence while the quarantine is in place. **Students will not be permitted to remain in student housing if they refuse to quarantine under these circumstances.**
- Meals will be provided for resident students who are in quarantine to pick up. Resident students also have the option to have their meals delivered to them.
- Residence Life staff and the Wellness Coordinator and/or designee will maintain communication at least one time a day (preferably by phone or video conference) with these students to assist as needed.
- After a resident student is approved to be around others again (in consultation with the Wellness Coordinator and/or designee together with a medical provider), the Wellness Coordinator and/or designee will work with facilities to have the quarantine space cleaned.
- If the person suspected to have COVID-19 presents a negative test result, the student who is in quarantine due to exposure to that individual may be permitted to leave quarantine early. Decisions to remove a student from quarantine are made by the College's COVID-19 Designee, Dr. Vicki Stanavitch.
